LETTER OF TRANSMITTAL

BUILDING AND LOAN DEPARTMENT,
TOPEKA, KAN., April 5, 1935.

Hon. Alf M. Landon, Governor of Kansas, Topeka, Kan.:

DEAR GOVERNOR—In compliance with the laws of Kansas, I have the honor to transmit the thirty-sixth annual report of the building, loan and savings associations of Kansas, at the close of business December 31, 1934. There were 150 associations operating in Kansas at the beginning of 1934. Since that time three associations have been voluntarily liquidated, and two associations have federalized under the provisions of the Federal Home Owners' Loan Act of 1933, which leaves 145 associations in operation at the close of the year 1934.

The report shows a decrease in total resources of our associations during the year 1934, as compared with 1933. This decrease can be expected to continue until there is an increased demand for funds for home financing, so that the funds offered can be used. The majority of the associations are seeking good investments.

Some sections of the state, due to drought conditions, have not been able to make much progress toward normal operation of their business, or meeting demands. They are generally improving their reserves, however, and more firmly entrenching themselves against potential losses.

Respectfully submitted,

L. E. ROUSH, *Supervisor.*

FOREWORD

The statements of the building, loan and savings associations operating in this state will reflect several things of outstanding importance which, to this department, appears to be progress in the right way, and a change in the trend of affairs for which we have been working.

It is noticeable that the associations have, in the form of cash and liquid assets, approximately $8,500,000. This is several times over what the associations have had for several years. It is also noticeable that the real estate in these associations increased less than $1,200,000. The contingent reserves, to protect the associations against losses, have made substantial increase of approximately $1,000,000. A number of associations that were not paying dividends have returned to the dividend-paying basis, and others are preparing to do so this year.

The federal housing act, passed by the recent Congress for the purpose of promoting home improvement, as well as home ownership, is being given favorable consideration. Senate bill No. 155, passed by the 1935 Kansas legislature, makes it legally possible for the associations in this state to cooperate in this federal program.

The home owners act of 1933 made it possible for the organization of federal savings and loan associations under the federal home loan bank board, in communities where there are no local home financing institutions, or where home-financing institutions are not in a position to care for the home financing. It also provides for the conversion of a state incorporated association into a federal savings and loan association. House bill No. 585, passed by the 1935 Kansas legislature, provides that a state incorporated building and loan association can become a federal upon the approval of seventy-five percent of the shareholders. It further provides that a federal savings and loan association can become a state association and receive a state charter upon passing a certain examination and complying with the state laws.

The Federal Home Loan Bank of Topeka, known as District No. 10, comprises the states of Kansas, Nebraska, Colorado and Oklahoma. The Kansas associations have rapidly taken membership in the system. The membership in the states is as follows: Kansas, 97; Oklahoma, 44; Colorado, 34, and Nebraska, 14. It is noticeable that Kansas has more memberships than all the other states combined.

Title 4 of the national housing act establishes the Federal Savings and Loan Insurance Corporation for the purpose of insuring shares in building and loan associations to the extent of $5,000 to any one shareholder, created similarily to the FDIC for banks. The act as passed originally had some objectionable features in that the premium rate is very high, and certain other matters pertaining to reserves has hindered the plan from being very popular. There is before Congress at this time a measure correcting many of the objectionable features and the house of representatives in Congress has approved and passed a measure that proposes to reduce the premium rate to one half the amount

in the original act, and adjust many other parts wherein objection was made to the original act. If finally enacted along the lines suggested in the house measure, no doubt the insurance of shares will become more popular with our associations and will very rapidly, no doubt, be subscribed to by the associations of this state.

Senate bill No. 3, enacted by the 1935 Kansas legislature, was suggested by this department in order that the association, if need be, would be able to reorganize in such a manner as to qualify for the insurance of shares under this government corporation. It will also permit an insolvent association that is in the charge of the department, or in receivership, to reorganize, provided the shareholders, by a substantial majority, wish to do so. Incidental to such reorganization, the association can either segregate the frozen, unproductive assets from the good and paying assets, or make such a revaluation of the shares as may appear to be warranted and advisable. This matter is left entirely with the shareholders to determine and upon what equitable basis it is to be carried out. The department also must give its approval.

Report of Building and Loan Associations

OFFICIAL REPORT OF THE CONDITION of all building and loan associations located in the state of Kansas, at the close of business December 31, 1934.

FINANCIAL STATEMENT

LETTER OF TRANSMITTAL

BUILDING AND LOAN DEPARTMENT,
TOPEKA, KAN., May 1, 1936.

Hon. Alf M. Landon, Governor of Kansas, Topeka, Kan.:

DEAR GOVERNOR—In compliance with the laws of Kansas, I have the honor to transmit the thirty-seventh annual report of the building, loan and savings associations of Kansas, at the close of business December 31, 1935. There were 145 associations operating in Kansas at the beginning of the year 1935. Since that time one new association has been chartered, the Commercial Savings and Loan Association of Wichita; two associations have been voluntarily liquidated, paying their shareholders in full; and six associations have federalized under the provisions of the Home Owners' Loan Corporation Act of 1933, which leaves 138 associations reporting at the close of the year 1935.

The report shows the general decrease trend in resources during the year 1935, but at some less proportion than the year 1934. Much of this decrease has come about through refinancing of loans wherein the value of the shares pledged as collateral security has been placed to the credit of the loan, and the loan rewritten for the balance, reducing the borrower's payments and making it easier for him to pay his loan. Also the fact that eight associations were taken out of the calculation, being liquidated or federalized, as mentioned above.

Most of the associations are seeking loans and have a very liberal amount of loanable funds. The drouth condition prevailing in the western part of the state last year has further hindered the making of much progress toward normal operation. A better situation is indicated, however, and as soon as economic conditions generally improve, we can expect a very rapid recovery. It is believed that real estate will find a better market this year than that experienced for some length of time. It is necessary for the associations to relieve themselves of the real-estate burden as rapidly as possible.

Respectfully submitted,
L. E. ROUSH, *Supervisor.*

FOREWORD

The statements of the building, loan and savings associations operating in this state show much progress in the right way, and the general change in the trend of affairs started in 1934 continued in the same way during 1935, although this may not be easily detected from the statements as they are published.

The year 1935 developed into an active loaning year, yet the associations closed the year with a very substantial liquid position, as they had in excess of $6,300,000 in cash and bonds. The real estate owned and judgments decreased slightly over the amount the previous year, which indicates the associations have been selling more real estate than they received. This trend represents progress, for the associations increased in real estate owned and judgments approximately $1,200,000 in 1934, while in 1935 the amount deceased about $400,000.

A number of associations have obtained insurance of shares through the Federal Savings and Loan Insurance Corporation, which was created under title IV of the national housing act for the purpose of insuring shares in building, loan and savings associations to the extent of $5,000 to any one shareholder. Twelve associations have been approved for insurance of shares up to April 30, 1936. Several other associations have made application and are in the process of determination.

Seven associations have taken advantage of chapter 128 of the 1935 Session Laws for the purpose of obtaining the insurance of shares, and this act is proving to be a very helpful means where the shareholders desire to get the benefit of the insurance of shares in associations that probably would not be eligible through any other course. An explanation of this act was given in the 1934 Kansas building and loan report.

Report of Building and Loan Associations

OFFICIAL REPORT OF CONDITION of all local and national building and loan associations located in the state of Kansas, at the close of business December 31, 1935.

FINANCIAL STATEMENT

LETTER OF TRANSMITTAL

BUILDING AND LOAN DEPARTMENT,
TOPEKA, KAN., April 15, 1937.

Hon. Walter A. Huxman, Governor of Kansas, Topeka, Kan.:

MY DEAR GOVERNOR HUXMAN—In compliance with the laws of Kansas, I have the honor to transmit the thirty-eighth annual report of building, loan and savings associations of Kansas, as of the close of business December 31, 1936.

There were 138 associations operating in Kansas at the beginning of the year 1936. Since that time one new association has been chartered, the Mutual Home Loan and Savings Association, Topeka; two associations have been voluntarily liquidated, one paying the shareholders in full, and the other paying the shareholders 90 percent of the book value of their shares on final liquidation; one association federalized during the year, under the provisions of the Home Owners' Loan Act of 1933, which leaves 136 associations reporting as of the close of business December 31, 1936.

The report shows a slowing up in the general decreased trend in resources during the year 1936. The decrease for the year 1935 was approximately $13,000,000, while the decrease for the year 1936 was approximately $5,400,000. A number of these associations increased during the year, while we have some associations yet on the decrease. Much of this decrease has come about through refinancing, wherein the value of the shares pledged as collateral security to the loan has been placed to the credit of the loan and the loan rewritten for the balance, reducing the borrower's payments and making it easier for him to pay his loan. The associations have in the past operated, as a group, upon the sinking-fund plan, whereby the borrower subscribed for shares which, at maturity, were applied against the loan and the same was canceled. Nearly all associations have adopted the direct-credit monthly reduction loan plan and are reforming their old loans as rapidly as it seems practicable and possible. This has been an important move, in the judgment of this department, but of course, while this reformation is taking place, shrinkage in total assets can be expected, even though they may be receiving more money and making more loans than they have in many years.

The associations have made a very substantial volume of new loans and have a sizeable amount of loanable funds, as will be noted by the statement. The real estate owned and judgments are on the decline. The serious drought condition last year hindered sales, but the associations have reduced their real estate about $1,000,000. I might add that this real estate in most associations is producing a very satisfactory return; taking the state over, an average of possibly about 7 percent.

Sixteen of our small associations are in the process of voluntary liquidation. The total assets amount to $1,073,526.51. I am pleased to report that but one association, since I have been in this department, has liquidated for less than the book value, and that liquidated at 90 percent of the book value.

Respectfully submitted,

L. E. ROUSH, *Supervisor.*

FOREWORD

The building, loan and savings associations operating in this state have made a definite trend toward an increase of resources. The associations during 1936 received much new money, although, due to the reforming of sinking-fund type loans, it has shown reduction of assets, when, as a matter of fact, many of the associations have received more money than they have had withdrawn from them, but the published statement would hardly reflect this fact.

The year 1936 was a good year from the standpoint of loans. Many new loans were made and a number of our associations were not able to find satisfactory investments for the amount of funds offered. The associations closed the year with liquid assets of cash and bonds in excess of $4,300,000.

The real estate owned and judgments decreased approximately $1,000,000 during the year, which is substantially better than the previous year, and the real estate owned and judgments held at this time are approximately $3,000,000 below the peak.

As of March 31, 1937, 24 associations had been approved for insurance of shares through the Federal Savings and Loan Insurance Corporation, which was created under title IV of the National Housing Act for the purpose of insuring shares in building, loan and savings associations to the extent of $5,000 to any one shareholder. Much interest is now being shown in this program of insurance.

Report of Building and Loan Associations

OFFICIAL REPORT OF CONDITION of all local building and loan associations located in the state of Kansas, under state supervision, at the close of business December 31, 1936.
